

Viewing and Evaluating Student Papers with Turnitin

In your Blackboard site, go to **Control Panel > Turnitin Assignments** to see a list of all Turnitin assignments you have created in the course. (If this option does not appear in your Control Panel, see the document: [Enabling Turnitin in Your Blackboard Course.](#))

For any assignment, click the **View** link to go to the “assignment inbox.” The assignment inbox provides a handy overview of the status of all papers. You can see students’ similarity ratings, download student papers, determine if students have looked at feedback, and more. Point your mouse at any item to show information about it.

Assignment Inbox

Nuclear Power

Nuclear power is made like many other types of power with key differences. This power creates electricity. There are many issues surrounding nuclear power. The facilities the produce the power are under pressures to run for more years then originally intended. This brings up the issue of how long should a nuclear facility be allowed to run safely. When dealing with nuclear power it is possible to make deadly weapons. This brings up the issue of who should be allowed to make nuclear power and how can we prevent the manufacture of nuclear weapons. There have been accidents in the past related to nuclear power. There are many valid safety concerns about nuclear power. This brings up the issue regarding the safety of using nuclear power. A current method to create electricity, nuclear power, brings up many issues all regarding safety.
