

Instructor Handout for Sharing a Desktop In Meetings

1 WHY DO INSTRUCTORS SHARE THEIR *DESKTOP*?

During a Meeting, instructors can go to another web browser tab or window and display a web site, such as the Durham Tech web site; click on the browser tab to display their Sakai course site; or open an application such as Word or PowerPoint, and display, edit and save a document or presentation.

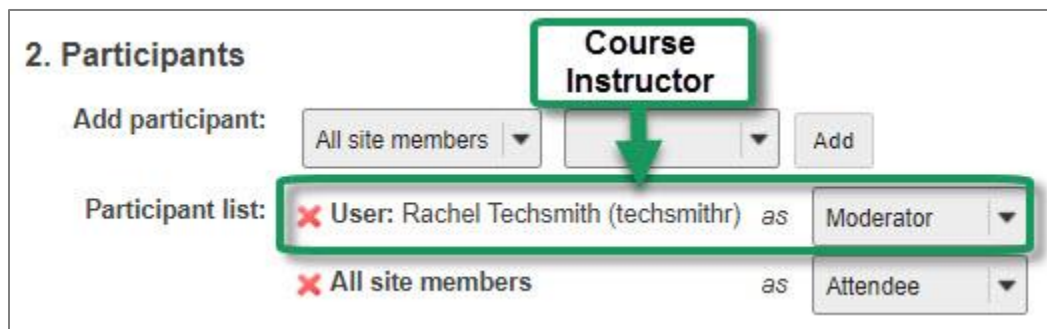

2 HOW DO YOU *CREATE* AND *RUN* A MEETING?

Follow the instructions in In Sakai Instructor Resources at <http://bit.ly/SakaiMeetings>: [Create a Meeting handout](#) and [Running a Meeting handout](#).

3 *WHO* CAN *SHARE* A *DESKTOP*?

Moderators and *Presenters* (who have **Java** enabled) can share whatever they display on their computer, with their Meeting **participants/attendees**. Who are moderators and presenters? When you create a Meeting, by default, all students are added as attendees in the Meeting.

- The instructor who creates the Meeting is assigned the role of the **moderator** of the Meeting.

- Alternatively, the instructor can temporarily give/take away a *presenter* role to a participant; by going to the Users module, the instructor can click to the left of a participant's name in the status column.
 - The participant will now be able to do everything a moderator can.
 - **Note:** Only one participant can be given the presenter role at a time.
- If you want to assign **specific** students as moderators throughout a meeting, the instructions are included in the [Create a Meeting](#) handout at <http://bit.ly/SakaiMeetings>.

4 WHAT DO YOU NEED TO DO *BEFORE SHARING* YOUR *DESKTOP*?

Desktop sharing works for Mac, Unix, and PC platforms. Use the **Firefox** or **Chrome web browser** to share your Desktop.

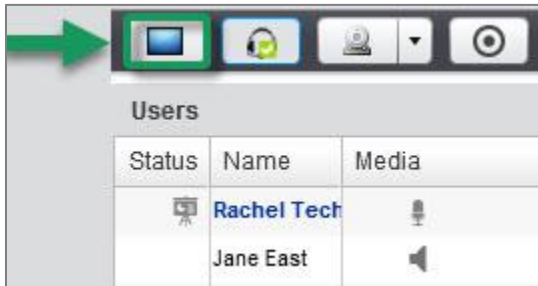

- **Network:** We recommend that you use a wired (not a wireless) network, for the best results when sharing your desktop/laptop. Otherwise, you could experience audio issues.
- **Software:** To share your desktop, you must have the latest version of Java installed. If needed: [Install Java on your computer](#) or <https://www.java.com/en/download/>.
- **If Java is not working after you install it:** Here are the step-by-step [Java troubleshooting instructions](#) or https://java.com/en/download/help/troubleshoot_java.xml.

5 HOW DO YOU *JOIN* A MEETING?

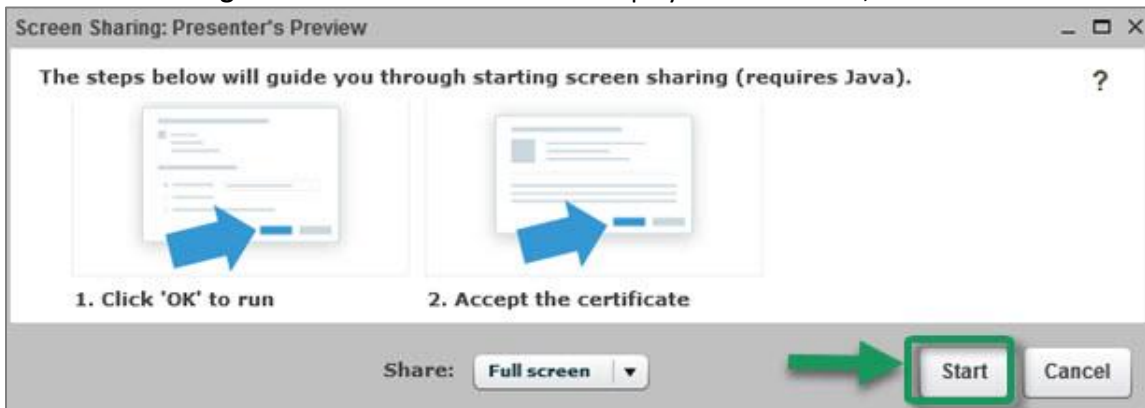

- 1) On the course menu of your Sakai course, click on **Meetings**.
- 2) Click on the **Meetings name** (it must have a status of *Available* or you can't join it).
- 3) Click on the **(Join meeting)** link. You'll see a message that your Meeting is connecting to the server, and modules are loading. Follow the steps to check your audio set up.

6 *STEPS* TO SHARE YOUR *DESKTOP/SCREEN* IN A MEETING

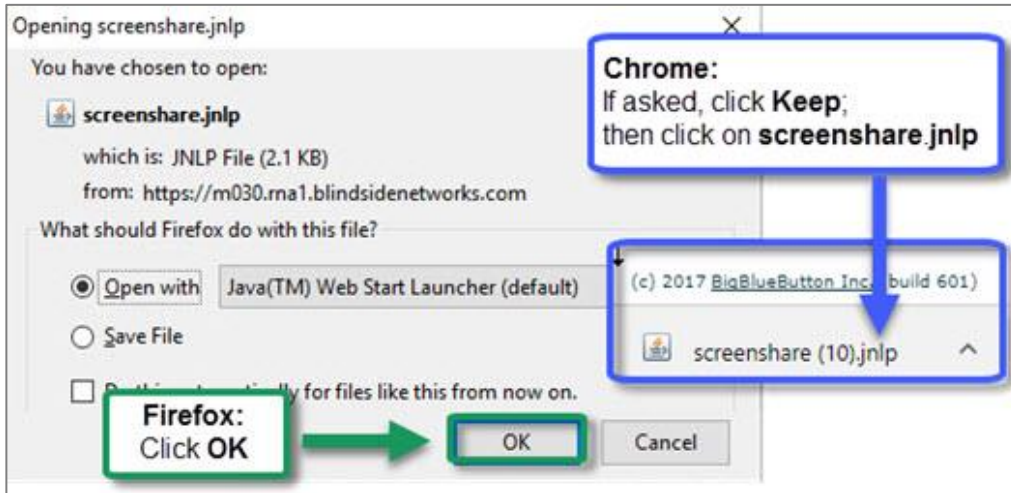

- 1) At the top left, above the Users module, click on the icon to share your screen.

- 2) **The Screen Sharing: Presenter's Preview** box will display. At the bottom, click **Start**.

- 3) To open the “screen share” file:
 - a. For **Firefox**: In the dialog box, click **OK**
 - b. For **Chrome** (at the bottom of the browser window):
 - i. If asked a security question, click on the **Keep** button;
 - ii. Then **double-click** on the **screenshare.jnlp** file

- 4) In the dialog box asking “Do you want to run this application?” Click on the **Run** button to download the application.
- 5) You’ll now see a blue outline around the recording area, usually your whole screen. In the lower left, you’ll see a preview of what your students can now see in Meetings.
 - At any time you can click **Pause/Restart** or **Stop**, to return to your presentation.
