New Sakai Tools (bold items may need to be added to Site Info-Edit tools list)

Sakai Tool	Description
Blog	A blog is an online journal, in which individuals can write entries, ordered by date, which they can share with others. Members of the site can comment on each others' entries.
Chat Room	You can use the Chat Room tool for real-time, ad-hoc conversations among site participants who are logged into the site at the same time.
Email Archive	Each site has an automatically generated site email address, which you can view via the Email Archive tool. Email you send to the site email address is copied to all site participants and owners.
Meetings	Sakai can be integrated with a BigBlueButton server, which allows Sakai users to easily create, manage and join BigBlueButton meetings from a Sakai site.
Podcasts	A podcasting tool which takes advantage of the Resources tool for storage, but displays podcasts in a user friendly way and provides an RSS feed for access through one's favorite podcatcher.
Polls	Good for quick, one question polls. The poll tool allows site maintainers to post simple multiple-choice polls for the voting of site participants.
Post'Em	Alternative way to record grades and post feedback using csv spreadsheets: Using the Post'Em tool, you can upload a comma delimited (CSV) spreadsheet to present feedback to site participants.
Search	Find content within the resources/tools of the site.
Sign-up	Faculty needed a system that would allow students to sign up for office hours, meetings, review sessions and other events in one convenient place.
Wiki	A Wiki is a tool for people with no technical knowledge to change and create web pages. Wiki was designed specifically for lecturers to collaborate on documents, share information and create teaching materials.
