# Quick Tips for using the NCLOR with Blackboard

For more detailed info, see:
http://courses.durhamtech.edu/wiki/index.php/Bb:_NCLOR

To add NCLOR content to your Blackboard site:

1. Log in to Blackboard, and go into a course that you are teaching.

2. Go to a content area where you would like to add NCLOR content and click EDIT VIEW
   (or go into Control Panel and then into a content area)

3. From the drop-down menu in the upper right area, choose EQUELLA OBJECT, then click GO.

4. Search for content in the NCLOR.
   Recommended: Use Basic Search, Power Search, or Browse to focus your search.

   TIP: To preview an item before adding it to your Blackboard site, right-click on the item's title and choose "open in new tab" (or "open in new window"). This will allow you to peruse the item in a separate tab or window.

5. In Blackboard, to add an item to your course, click "View more details…" for that item.

6. Click SELECT to embed the item in your Bb site.

7. If needed, edit the name, description, and availability. Then click SUBMIT.
